

Integration with timesheets, expenses and third-party applications such as key card entry systems bring timely, accurate data into one place for prompt processing. Fully HMRC-approved, your payroll can handle any combination of pay types and deductions. Cut paper wastage and reduce bottlenecks with e-payslips. Detailed personnel information is enhanced with a series of easy-to-use tools which enable your HR department to manage everything from recruitment to absence tracking, analysis and appraisals.

Payroll processing

Simplify your payroll processing

Your system is designed to give you more time for value-adding activities, away from routine payroll administration. As you'd expect, all your statutory requirements are covered while everything from Directors' Pay & NI to Student Loan calculations are dealt with automatically.

Flexible paytypes

Handle multiple payroll types and frequencies with ease. A large number of the most commonly used paytypes and deductions are included, and additions easily created. Multiple payments and allowances such as bonuses can be easily accounted for, and expressed as a weekly or monthly value. Salary increases and deductions are calculated automatically and you

can preview the effect any calculation has on net pay at any time. Non-payable paytypes such as holiday can be linked to any deductions, quickly showing you the outstanding value of deductions against time accrued.

Deductions

Multiple deductions such as season ticket loans can be activated for specific periods, shut down when the balance is paid and reactivated with minimal effort. Payments such as benefits in kind (e.g. gift vouchers) can be applied company-wide.

Pensions can be entered as a fixed sum or as a percentage of salary, and Additional Voluntary Contributions made at any time. COMP and COSR pensions can also be specified and PAYE, NIC and SSP tables are formatted in line with HMRC conventions.

Appraisals

Reports give you visibility of appraisals that are either pending or incomplete so nothing gets overlooked.

Who we are

Our special skill lies in combining and refining industry standard accountancy packages to form a solution that matches your unique business needs and challenges - from in-depth reporting on business intelligence to breakdowns of profitability per client or project, to enabling the remote data entry of timesheets, expenses or sales information.

Right down to providing real-time snapshots of business performance for senior managers on their desktop.

Our solutions deliver an unlimited number of databases to match your company structure, enable head office control of unique record management, structure Management Accounts consolidation to suit your specific needs or implement serial number stock control, that sets stock levels for warehouse management.

In short, Netcom makes sure your accounting and business system transforms the way you work and control your business.

We do this by partnering with our clients, working with you to meet every challenge in a way that is cost-effective, and, above all, reliable.

Possibilities are infinite
